100T Anchor Handling And Towing Winch

Medium pressure anchor handling towing winches cover a wide range from 50 tonnes to 250 tonnes pull on the first layer at nominal design speeds from 6 to 30 metres per minute. A choice of standard or large barrel capacities can be offered for each model listed and other sizes can be provided to suit special requirements.

The winches are designed to operate in a power only mode , but a free fall characteristic can be incorporated if required. Winches can also be fitted with additional warp ends and declutchable barrels and chain lifters.

All standard winches can be fitted with automatic wire spooling gear if required. Ancillary equipment with load indication and length counters can be incorporated for remote control operations.

A full range of hydraulic Power Packs and components can be provided if required.
