Armored Hose

General description

Armored hose is used in dredging mining project and assorting with the pipe line with high importance. The hose is mainly applicable for transporting mineral which has sharp interface, bigger volume, heavy specific gravity and comparative strong impact, for example diamond and ore.

Advantage

- Using the super abrasion-resistant 30CrMnSi as the working surface.
- Directional installation and connection
- Excellent using stability and splendid transportation.
- Building with HB400 wear rings and high abrasion resistance.
- Inner liner of excellent abrasion-resistant performance.
- Favorable bending resistance.
