China BGJ-C Induction Remover:

BGJ-C Induction Remover

The energy-saving BGJ-C bearing induction remover is widely used in rolling mills, railway locomotive depots,ports,docks and other industrial and mining enterprises.Anew generation product for thermal disassembly of bearing inner ring,retaining ring,seal ring,gear,coupling,etc. This product applies the principle of electromagnetic induction to generate an induced current in the inner ring of the bearing, causing it to heat and expand, thereby generating a Clearance for easy disassembly. Due to the rapid, uniform,clean and pollution-free induction heating,high heating quality, and ensuring that the bearing is not damaged, this advanced disassembly method is gradually replacing baking, oil cooking and other methods.
