Description

Used in engine room, DJC-M gathering all the information of the engines and machines, including running status, working parameters, alarm status, and display these information on the CRT in the control room. These information can be extended to bridge, public area, chief engineer and duty engineer's cabin. If a fault occurred from any machines, DJC-M will automatically generate an audible and visual alarm, and print out this record at the same time. DJC-M can also record all the status and parameters, to make ship crew work more easily.
