China Dredge Rubber Hose:

Dredge Rubber Hose is used to connect pipe in order to flexibility during working, flange on the both end, which is easy to install.

Production Standards:

National standard, American standard (ANSI), German Standard (DIN), Japanese Standard (JIS) and process non-standard products.
Dredging rubber mud hoses and suction hoses are made of natural rubber, strong textile fibers, steel skeleton and synthetic rubber which produced by multi-channel production process. With superior abrasion resistance, high working pressure and strong flexibility, JINBO MARINE Rubber hoses can be bent freely in the water and used for long time. Flanges are fixed on both sides of the dredging rubber hose.
