Certificate	ABS, LR, BV, DNVGL, NK, KR, IRS, RMRS, CCS

We can supply according to your requirement, drawings, class certificate needs, and delivery schedule.

Technical Specifications

Category	Pipe Floater	Model / SKU	Dredging-Floater
Standard	DIN	Material	MDPE
Weight / Size	The surfaces of the cylinder is checkered design, prevent slippery, safe stable, quadrilateral shape high density and strong support, can load 350 kg per square meter.	Surface	The surfaces of the cylinder is checkered design, prevent slippery, safe stable, quadrilateral shape high density and strong support, can load 350 kg per square meter.
Certificate	ABS, LR, BV, DNVGL, NK, KR, IRS, RMRS, CCS	Warranty	12 Months unless specified otherwise
Origin	China

Dredging floater

General description

This dredging pipe floater by the level of UL 746 c - 94 - hb flame test shows that it has good resistance to weathering and devastating impact resistant, can withstand the shock wave, frozen, ship collision, such as damage, from the erosion of oil, chemicals, etc; The surfaces of the cylinder is checkered design, prevent slippery, safe stable, quadrilateral shape high density and strong support, can load 350 kg per square meter. In 60 c to 80 c or less temperature can work normally, installation is simple, flexible, fast, not human consumption, shorten the construction time and cost savings at the same time, the modelling of the various needs can be configured. Normal diameter from 65-800mm.

Advantage

- compact structure and reasonable, simple installation, good performance
- Good toughness, environmental stress cracking resistance is strong, is suitable for the construction and lakes on the ocean
- High bearing capacity, light weight, high resistance to wear, easy to install and transport, transport cost is low, cylinder stable and durable
- Strong corrosion resistance, weather resistance, long life, is three times the service life of steel buoy. Anti-corrosion, antifreeze, oxidation resistance, resistance to ultraviolet reinforcement material, from sea water, chemical, pharmaceutical, oil, and the erosion of aquatic organisms.
