Electric Logging Winch

Description:

DCJ Electric Logging Winch is mainly applied in the measurement of petroleum wells (vertical, directional, cluster), by lifting and lowering measurement instruments to obtain the gradient, location and depth of the wells. It is driven by the electromagnetic governor motor, transferring torque to the drum through sprockets, equipping with speed controller to control the rotary speed of the drum. It is ideal equipment for logging petroleum wells.

Features:

- Automatic spooling device.
- Simple brake device is easy to operate and reliable to use.
- Wide range of speed control and high precision.
- Automatically show the depth and easy to reset.

Technical Specification:

Electric Power(KW)		4-7.8
Logging Depth(m)		4000-7000
Roller Speed(R/min)		15-150
Max Lifting Weight(KG)		80
Dimensions	Length(mm)	859
	Width(mm)	920
	Height(mm)	975
Wire diameter(mm)		2.2-2.5
Weight(KG)		430
