- Product Description:
- Main Technical Specification:

Product Description:

Electro-Hydraulic Valve Remote Control Device is consists of control console,electric-hydraulic actuator, butterfly valve and manual hydraulic emergency pump station. The device combined the feature of both hydraulic and electric remote control function,it features compact structure,smooth movement, low energy comsumption,low voice and easy maintenance etc. It was widely used in the oil tank, chemical tank, oil platform or floating dock etc area, to make sure the operator can control the start or close of pipeline or valves in remote area.

Main Technical Specification:

Model: YFK-06DY

Power supply: AC220V 50HZ or 60HZ.
Working temperature: -10 to 55 centigrade

Relative humidity: Equal or less than 95%

Working pressure: 11Mpa

Protection: IP22 (control console) , IP56 (electric-hydraulic)
