## Float Ball Valve Drawing

## China Float Ball Valve:

The float ball valve is applied to control the water level for various kinds of water supply tanks on the vessel. When the water level is rising, the float ball is rising with the water level and reaches a certain position, the valve is closed by the connection rod. When the water level is dropping, the float ball valve drops with the water level and the valve is opened by the connection rod, and keeps the water level at the constant position.

## Main Size List(mm):

Nominal Size	Structure Size			Flange Size					Ball Dia	Tank Opening Hole Dia
	H	H1	L	D	D1	b	n	d		
DN	H	H1	L	D	D1	b	n	d	d0	D0
15	320	78	95	95	65	14	4	14	150	36
25	320	78	95	105	75	16	4	14	150	36
20	330	80	95	115	85	16	4	14	180	38
32	360	100	110	140	100	16	4	18	180	50
