Description:

HBNA-20 Sewage treatment plant combines oxidative degradation, microfiltration and physical disinfection to treat domestic sewage from kitchen, toilet and bathroom of ships (also applicable to factories and mining enterprises such as government, schools, hotels, residential buildings, etc.). Compared with the same type of products, it has the characteristics of small size, light weight, compact structure and no secondary pollution. The discharged water treated by the device meets the discharge standard stipulated in IMO resolution MEPC.227(64) and obtains the CCS type approval certificate.

System schematic diagram：

Techinical:

Model	HBNA-20
Hydraulic Load	1400 L/DAY
Organic Load (kg/d BOD5)	0.7
Voltage	AC220V/AC380V/AC440V
Certificate	MEPC.227(64)
Power(kw)	1.5
Outline Dimension（mm) L*W*H	1100*915*145
Weight(Dry.kg)	480

CCS on Behalf of VR Inspection & Testing:
