JGB-120 Marine Dumpling Machine

1. Scientific structure, automatic forming
2. During production, just put the dough and fillings into the designated entrance, and the dumplings can be produced automatically when the machine is turned on
Simple operation and strong controllability
3. The amount of filling and the thickness of the dough can be adjusted at any time. The dumplings produced are filled with thin skins, fast production speed, saving labor and time
3. Excellent selection of materials, precision manufacturing
4. The main components of the dumpling machine are made of food-specific stainless steel materials, and the noodles and forming parts are made of special anti-adhesive technology materials. It has low resistance, good molding, wear resistance and pressure resistance, easy disassembly and cleaning, and durable
5. Equipped with stainless steel adjustable feet for easy installation
