China Mairne Seawater ice-making machine:

Introudced advanced European technology, with the feature of Chinese fish boat, develop marine seawater ice-making machine to fit china’s national conditions. Install in limited finish boat space directly , making flake ice through use of water, to keep fresh for seafood product in time.

Feature of marine seawater ice-making machine:

1. Use seawater to make ice , ice block shape is like fish scale. Thickness 1.5-2.2mm, ice-temperature -0.6℃-10℃, has salinity , high valve to keep fish.
2. Use ship’s power directly, adapt to severe sea conditions, making ice normally under 35 degree of ship sway.
3. Full –automatic control system, make ice at any time , no hand operation, safe and reliable , labor-cost saving, low-operation cost.
4. Ice-machine adopt 316 stainless steel, anti-corrosion, main component adopt marine configuration, the service life of the machine is more than ten years.
