We can supply according to your requirement, drawings, class certificate needs, and delivery schedule.

Technical Specifications			
Category	Nitrogen Generator System	Model / SKU	Marine-PSA-Nitrogen-Generator-Purity-99-99
Standard	DIN	Material	Nitrogen system takes natural air as the raw material and adopts the international leading energy-saving design technology to ensure that the highest nitrogen yield is obtained with the lowest raw air.
Weight / Size	Advanced absorber design, completely out of the traditional concept of "ratio" design, size and size based on the molecular structure of the air flow and characteristics of sieve absorber.	Certificate	ABS, LR, BV, DNVGL, NK, KR, IRS, RMRS, CCS
Warranty	12 Months unless specified otherwise	Origin	China

CONTENTS

- China Marine PSA Nitrogen Generator Purity 99.99%:

- Marine PSA Nitrogen Generator Purity 99.99% Main Specification

China Marine PSA Nitrogen Generator Purity 99.99%:

1. Nitrogen system takes natural air as the raw material and adopts the international leading energy-saving design technology to ensure that the highest nitrogen yield is obtained with the lowest raw air. The whole machine consumes less electricity and the cost of environmental protection is low.
2. Advanced absorber design, completely out of the traditional concept of "ratio" design, size and size based on the molecular structure of the air flow and characteristics of sieve absorber.
3. Unique design of air distributor, to prevent the short circuit of the air flow channeling, the airflow in the adsorption bed of the flow is more uniform, thereby improving the utilization of adsorbent.
4. Automatic pressing cylinder device and air inlet mode characteristic, make the airflow direction in the absorber is always the same, avoid the adsorbent fatigue in the frequent switching cycle of wear, effectively ensure the adsorbent for up to 10 years of life.
5. Unique adsorbent inertia force gradient, the loading density of adsorbent loading more tightly, prevent peristalsis and pulverization of adsorbent, the adsorption efficiency is better, to further ensure and lengthen the life span of the adsorbent.
6. Intelligent fully automatic control, simple operation, easy to open and stop, no need for special duty.
7. The high-purity nitrogen gas is prepared by one-step process. The high-purity nitrogen gas with purity of 99.9995% can be directly prepared without purification unit. The equipment has low operation cost, low investment and high performance price ratio.
