DEIF Paralleling and protection unit (PPU 300)

The marine and offshore industry faces many challenges in terms of cost, space, efficiency and reliability. When investing in products and systems which monitor and control critical infrastructure such as generators, customers need the assurance that the products can meet these challenges not only from an initial design and installation perspective but also for long-term service, maintenance and upgrades. For customers who are seeking a cost-efficient, yet flexible generator control solution, DEIF's innovative PPU 300 is a versatile and intelligent solution, specifically designed to meet these challenges.
