Self contained breathing apparatus is a new model of self supporting open respirator,which is widely used in fire-fighting,chemistry industry,fired boat,petrolium industry,smelt,mine and transportation. It is a high-performance respiratory potective device designed for fireman and specialtrained person when trapped in the situation with smoke,pollution and hot vapor to perform the extinguish,rescue and ambulance.

Condition:

The atmosphere is polluted by smoke,poisonous gas or/and hot vapor,or in the hypoxygen situation

In the atomsphere of -30°C~+60°C,at 0~100% relative humidity and 70kpa~125kpa atmosphere pressure.
