China SCG025 Boat Reverse Gearbox:

SCG025 Boat Reversing Gearbox are servo-automtically controlled helical gear transmission developed for use in pleasure craft and commercial craft,the servo-operated multiple-disc clutch requires only minimum effort for gear changing,making the SCG transmission suitable for single-lever remote control via a rod linkage or bowden cable.

The torque transmission capacity of the clutch is exactly rated. Preventing shock loods from exceeding a predetermined value to ensure maximum protection of the engine and thus providing the effect of a safety clutch.
