Product Description:

The seawater desaulting unit adopt SJ unltrafiltration membrane,USA Taoshi sea water desalination membrane and DANFOS high pressure water pumm combination. Reverse osmosis technique is a high efficient technique, it rely on pressure drive to separate the water and the ion, to reach the aim of pure and comcentration. The process no phase change,no need heating,energy consumption is low, low operate cost,no pollution, easy to operate, high productivity, high quality water etc advantage. It was the most energy saving technique in seawater and bitter desaulting.

Working Process:

Raw water to UF pretreatment systenm to Danfos high pressure pump to USA Taoshi reverse osmossis to pure the water.

Component:

Water intake system,pretreatment system,seawater desaulting system,energy recovery system,chemical clean system,chemical adding medicine system and device power supply and distribution and self control system, this device also have ultraviolet sterlization system.

Available model:

1 m3/ hour,2 m3/ hour,5 m3/ hour,10 m3/ hour,15 m3/ hour, 20 m3/ hour,other can be customized.
