- Technical data:

TBS-10 1m3/h Oily Water Separator :

1、Greatly improve the ability to the oil-water separation,especially greatly enhanc the effectiveness of the treatment of emulsified oil by using primary gravitational and secondary coalescence separation.
2、Ensure thye safety of the treatment effect due to using the tertiary separation with new special filter material.
3、Prolong working life of coalescence filter element for its back wash structure.
4、Have the function of manual and automatic operation that can meet the requirements of UMS(unattended machinery space).
5、Easy to install,operate and maintain due to modularized and integrated design.
