China Weather Station AM706D:

The marine weather station AM706D is a multi-functional measuring instrument.

It can accurately measure and display real-time relative wind speed and direction, true wind speed and direction (with GPS

input), air temperature, relative humidity and barometric pressure.

In addition, it can print these parameters of time, longitude and latitude, ship speed, and navigational signal. It is important and necessary for observation and safe navigation.

Features:

10.4 inch color TFT LCD
Relative/True wind direction & speed

Temperature, humidity and air pressure

Alarm of wind speed/temperature/humidity

Data print out with printer DUP-414 (optional)
