China AM-100 Digital Anemometer:

AM-100 Digital Anemometer is specially designed for marine use. The transmitter installed on radard mast is made of special nylon to protect from strong wind and salty air at sea. With 72 LED indicators,both relative and true wind direction can be clearly displayed. For large vessels,up to four display units can be installed on bridge and other locations on board. For easy operation,a remote button can be installed at operator's to control the display unit. The digital anemometer can provide sxi ports of RS-422 wind data to various externals, including (S) VDR,INS,etc.
