Main Technical Parameter

Model: BD2-500
Electric source:~220v/50Hz~220v/60Hz
Power(w): 802
Cubage: 500L

Temperature: 18~13°C

Dimension(mm): 650x800x1910H

Weight(kg): 130

Structure Feature

Refrigerator adopts famous brand compressor, high-efficiency condensation unit group, it has advantages of beautiful profile, easy to maintain and repair, etc. The box body is equally adopting high-density polyurethane foam, with good heat preservation performance and energy saving. The interior and exterior shell of box and door is equally adopting superior quality of stainless steel plate, which is bright and clean, easy to clean and wearing well. Adopt forced type of cooling wind circular design, temperature in the box is average. Be more rapid in refrigeration effect. Adopt digital micro-computer thermometer (here is thermometer for short) with feature of reliable performance and real time of temperature display.
