Description:

Fan coil is unit is the end device, which can deal with the temperature and humidity of air conditioning system indirectly. The unit has features of newdesign, easy-operation, stable-working, safety and convenient-maintaining, etc. They are widely applied for all kinds of passenger ships, cargo ships and oil platforms etc.

Feature:

1. Mainly composed of water-air cooler and fan etc
2. Low noise fan;
3. Pressure test, vacuum test and running test have been done before delivery
4. Ready for operation only when connected with pipes and power source after installation
5. Design, manufacture and inspection comply with “CCS” and “navy” standards 6.Special design and manufacture can be done upon user's requirement
