- Basic Parameters:

Serviceable range:

1. Voltage:AC220V Frequency:50/60Hz

2. Ambient temperature:-40°C ~ 40°Cair relative humidity is not more than 90 precents.

Basic Parameters:

1. The insulation resistance should not be lower than $500M\Omega$ when it is in the cold condition(indoor 18-20°C).
2. The insulation resistance should not be lower than $200M\Omega$ when it is in the hot condition (tallest work temperature).
3. The insulation resistance should not be lower than $200M\Omega$ when it is in the hot and humid conditions.
4. After the water immersion experiment, the electric hot plate has been immersed in water for 1 hour holistically then take out for 2min, the insulation resistance should not be lower than $M\Omega$.
