Origin	China		

China Connecting Rod For Marine Air Compressor CVF-43:

The connecting rod is connected with active and driven members at the two ends to transfer motion and force. In the reciprocating plug type power machinery and compressor, connecting rod and crank are connected by connecting rods. The connecting rod is mostly steel parts. The sections of the main part are mostly circular or I-shaped, with holes at both ends, and a bronze bushing or needle roller bearing in the hole for the axle pin to be hinged.
