CPW Series Marine Sludge Discharge Pump

General description:

CPW Series Marine Sludge Discharge Pump is a motor-driven horizontal single-channel impeller centrifugal drainage pump. The pumps of this series are suitable for transferring sewage, industrial waste water, oily water, fresh water or sea water at a temperature below 85 degree, containing solids with a diameter up to one third of that of the pump port, and fibers with a length up to five times of that of the ports. They are best choice for use in conjunction with wastewater treatment plants.
