CONTENTS	■ General:	■ Features:
	■ Structure:	■ Main Parts:
	■ Main Parameter:	

General:

CZ series marine axial fan (also called as JCZ marine axial fan) is capable of blowing air, ocean air with salt vapor, and corrosive air which contains a small quantity of oil vapor. They are suitable for the ventilation of the cabin air ventilation as well as boiler ventilation, also applicable for other suitable places. The fan is designed and manufactured according to GB11864-1990 Marine Axial Fan and the current Ship Building Norms.

Features:

- 1.The casing can be opened.
- 2. Reverse Rotation is allowed
- 3. Good anti-corrosiveness

4.Strong resistance against swing, vibration & impact.

Structure:

The fan is manufactured with a built-in motor structure. The impeller is directly mounted on the motor shaft. The impeller is made of anti-corrosive aluminum alloy while the casing is welded by common steel. The casing can either be made into an integral one or an open type and the motor is fixed on the movable half of the casing so as to bring convenience for on-site repair and the replacement of its spare parts. The fan can be matched with marine AC motor of 230V, 440V, 380v, 415v, 480v. The frequency can be 50Hz or 60Hz

Main Parts:

1-Casing: Carbon Steel

2-Angle strut

3-Motor

5-Terminal Box

12-Impeller: Aluminum Alloy

15-Guide Cowl: Carbon Steel
