Warranty	12 Months unless specified otherwise	**Origin**	China

GCJB-05/16 16-Point Alarm Indicator Panel

The 16-point alarm display is designed with microprocessor MCU control technology, and the product panel is PVC veneer technology, which has the advantages of small structure, convenient installation, beautiful appearance and reliable performance. It is mainly used for the alarm display of the security system. When the alarm signal arrives, the flashing buzzer of the alarm indicator makes a sound. When the noise is suppressed, the sound disappears and the indicator light becomes flat. If the alarm signal automatically disappears before the muffler, the signal is automatically maintained, and the light signal disappears when the muffler is pressed.
