China Metal Elastic Support:

The metal elastic support(CB*3321-88) is a new style vibration isolator which adopts stainless steel wire as elastomer, it is mainly suitable for ship diesel pipe system and base deck of main engine and auxiliary engine. And it also widely applicable in industry pipeline, power machinery, military and civil vehicle equipment, nuclear industry device and vehicle electroplate etc.

It is specially used for vibration insulation of varying duty and random vibration. When used for pipeline, it needs to cooperate with elastic hangers in generally.
