China RDFF Fixed Water-based Local Application Fire-fighting System:

The device is a modern marine firefighting product developed in accordance with SOLAS regulation II-2/10.5.6. It has characteristics of quick startup, good firefighting and low water consumption. And it Can extinguish or control fire on time without the necessity of engine shut down, personnel evacuation, Shutting down of forced ventilation fans or the sealing of the space. It is mainly used in the place of high Fire danger, quick spreading speed, bad fire effect and hard extinguishing.

Feature

1.5L/min per m² water discharge capacity, so that the potential water damage is reduced to a minimum

The durative of fire-extinguishing is very long for the facility of water source

Efficaciously control the fire and its heat extending for the very fine droplets of water spray

Efficaciously extinguish the liquid fire, which is a kind of lower flash point

Supply the main alarm panel with the process of PLC or PCB

Type approval: CCS, LR, EC
