- Principle Description

Application:

SDC series quick-close valve control box is a remote control plant, which is suitable for fuel oil tank, lube oil tank and daily supplying fuel oil tank of ship, to shut off oil circuits and prevent the fire from spreading.

Principle Description

The air source input from ship to the air receiver of air powered quick-close valve control box. Air pressure in the receiver can keep in setting valve through pressure controller. The air-powered-close valve's piston which is on the oil transferring pipe will be closed by air.
