

SEWAGE TREATMENT PLANT

SWCM(T) Series Sewage Treatment Plant

The device adopts the principle of activated sludge, contact oxidizing and external tubular membrane biological reactor to digest organic pollutant. Tubular membrane biological reactor can treat organic pollutant efficiently...

ISO9001 Supplier

Class Certificate

Export Supply

Key Highlights

Category	Sewage Treatment Plant
Standard	DIN
Certificate	CCS,EC,GL and BV certificate.

We can supply according to your requirement, drawings, class certificate needs, and delivery schedule.

Technical Specifications

Category	Sewage Treatment Plant	Model / SKU	SWCM-T-Series-Sewage-Treatment-Plant
Standard	DIN	Certificate	CCS,EC,GL and BV certificate.
Warranty	12 Months unless specified otherwise	Origin	China

- Advantages:

China SWCM(T) Series Sewage Treatment Plant:

The device adopts the principle of activated sludge, contact oxidizing and external tubular membrane biological reactor to digest organic pollutant. Tubular membrane biological reactor can treat organic pollutant efficiently, drastically and cleanly to ensure the effluent can meet the requirements of the resolution MEPC and other much harsher requirement.

Advantages:

1. The high integrated product has the advantage of less occupied area and more excellent impact load resistance ability.
2. The membrane flux is 6 to 10 times higher than ordinary immersion model membrane.
3. No concentrated liquid drainage. The recovery percent of water can reach up to 100% .
4. The device use large cross-flow membrane,there is no need to back flush when working.
5. The membrane used in this device has 2 to 3 times longer life than similar device of other factories.
