China U Type Rubber Fender:

The U type marine rubber fender is typically mounted to a dock or a ship to counteract the collision force between the dock and the ship generated during mooring and berthing, thus preventing ships and docks from being damaged.

Feature:

- 1. This type of rubber fender features high energy absorption performance and proper reaction force.
- 2. With high strength construction parts, it offers long service life.
- 3. It is easy for replacement.
