China WKD-1 Marine Fog Signal Air Horn:

The automatic fog control siren is the sound signal equipment of ship. When ship sails in fog, it has bad sight. To avoid collision and ensure safe sailing, ship must raise fog signal. This fog siren can raise both audible signal and light signal specified in the Convention on the International Regulation for Preventing Collisions at Sea, 1972. In fog, the labor strength can be reduced by it. This fog siren can electrically and manually raise siren of any rhythm and light signal.

This system is composed of automatic fog siren controller (embedded mounting) and electric siren.

Technical Specification

Product name	Type	Specification (supporting)	Voltage (V)	Pressure (MPa)	Ways for controlling siren	Length of ship	dB Sound level	Center frequency	Audibility range
Fog Horn for ship	WKD-1	One WD-1electric solenoid valve fog siren,charged heating, one fog siren controller	AC220V	0.7~1.0	Automatically electrically, manually	20-75 meters	130	160	1.0 miles
