

Double Warping Roller With Plate

Mooring roller can be named as deck roller, warping roller, marine roller. Marine mooring deck warping roller can be raised from the deck, called pedestal roller. The base is made of rolled steel plate for strength and long life.

Most of ships rollers are normally cast steel or cast iron and are built with self-lubricating bearings, providing an excellent, long, near maintenance free working life.

Combination type including double warping roller with plate, three warping roller with plate and more.

We can customized it according to your drawing.
