

R type Ship bollards

Feature:

1. Bollard Capacity: 10 to 300 Tonnes
2. Can be customized according to your drawing.

Mooring bollards is to secure vessel to dock by mooring lines.

The load rating of bollards is dependent on vessel, current, wind, and wake etc.

We can supply series bollards with loading capacity in different material and according to clients' drawing makes all types of bollards on request.

We designs and manufacturers one of the most comprehensive product lines of cast iron and cast steel marine mooring dock bollards in the world. Our **dock bollards** come in many popular shapes and sizes to suit most docks, jetties and wharves. We are able to adjust mooring bollards shape, wall thickness, material strength, bolt hole numbers & positions to meet the need of the most demanding applications with the right amount of material, meaning our bollards enjoy a long and trouble free service life.

We also customize bollard products for special requirements.

Available material: Cast Steel (JIS G5102), Cast Iron (JIS G5501), Ductile Iron/SG iron (JIS G5502).

We suggest the SG iron cast being considered as your first choice because of its higher strength as well as the corrosion resistance.

Finish: Bituminous paint is usually a preference of a customer.
